MEMORANDUM

To: Whom it May Concern

From: John M. Williams, Administrator

Date: December 1, 2006

SUBJECT: LETTER OF RECOMMENDATION

We are an oral surgery practice consisting of seven offices and more than sixty employees. Our computer network is essential to the viability and success of our practice. We look for a company to do more than develop and maintain our network. We wanted someone who could not only develop and maintain the network but could also help us secure it against ever increasing external threats. We also wanted a company that could provide us with a turn key product-network development, security, computer and peripheral needs, and maintenance of our network and equipment. Network Data Security Experts has done an outstanding job fulfilling all these needs. In fact, I believe their strongest attribute is their level of service. They are always available to assist us when the need arises. I strongly recommend the services of Network Data Security Experts. Please feel free to contact me if you would like to discuss the services we receive in our experiences with them in more detail.
